

OPENSOURCE®

How to create a visual time machine for your construction project

01

**What's going on in
our world**

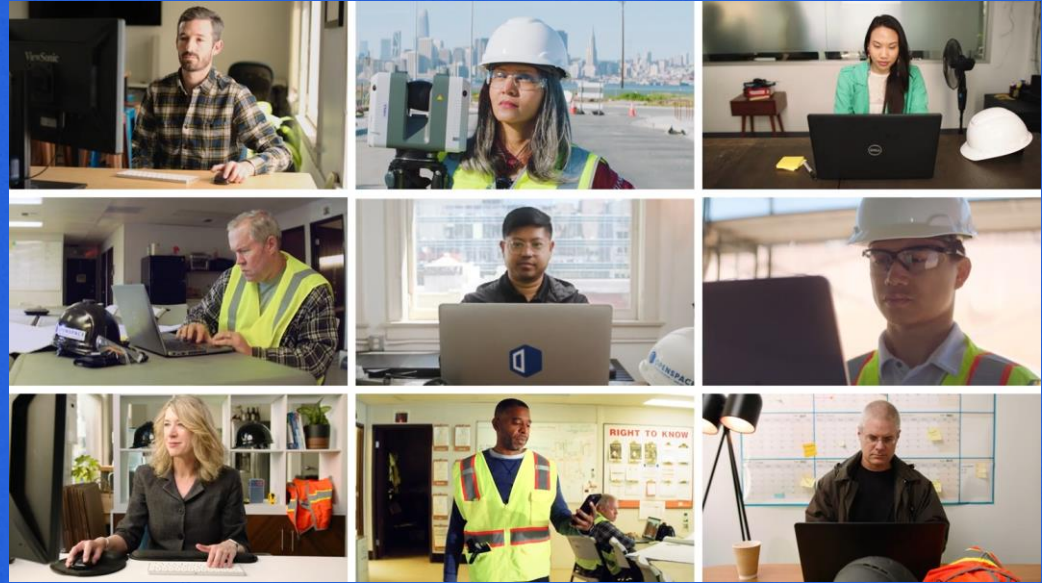

**Documenting sites
manually can take
a lot of valuable
staff time each
week**

**The only way to
know what is
happening on
project sites is to
travel there**

**Coordinating
different teams &
stakeholders
across multiple
projects is hard**

**Issues & related
disputes as a
result of poor
communication
cost time and
money**

What OpenSpace Does

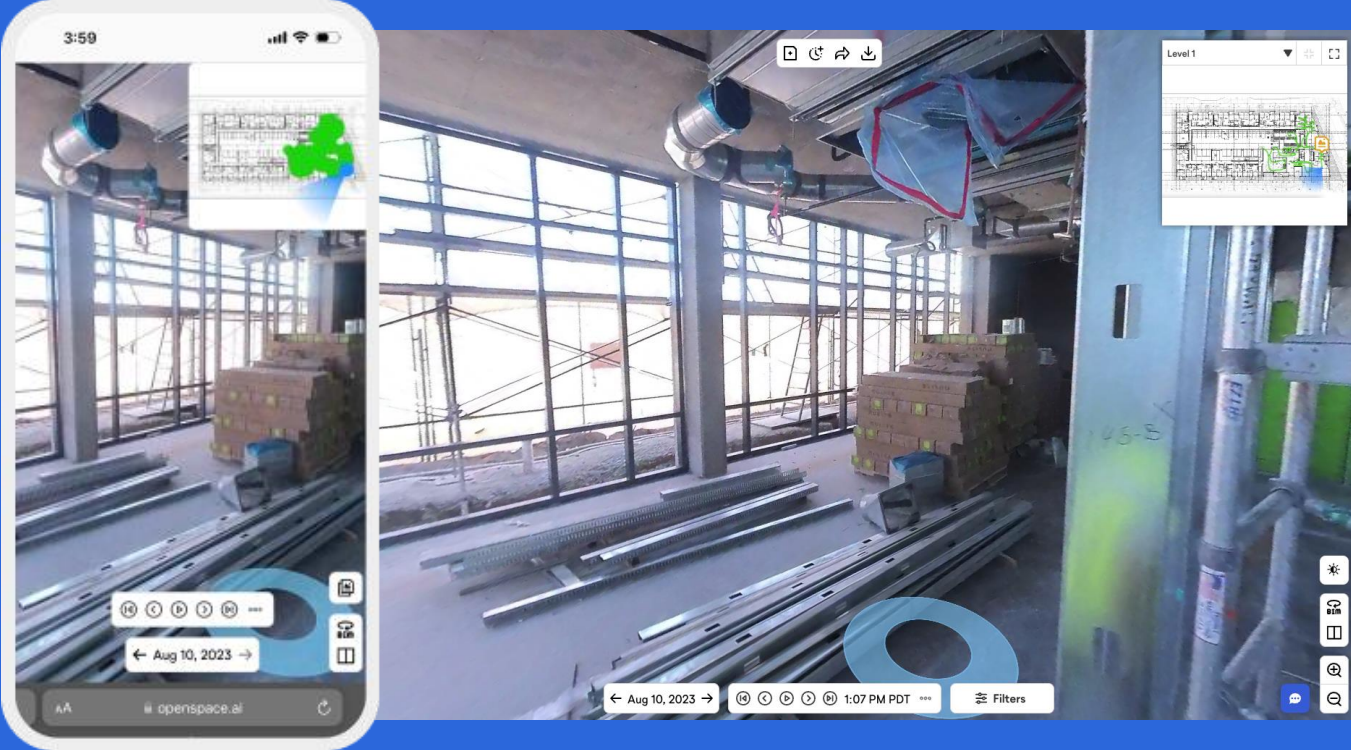

A photograph of a construction site under a clear blue sky. Several tower cranes are visible, including a red one at the top and yellow ones below. The cranes are positioned around a building's steel framework. In the foreground, there are streetlights and a yellow safety fence. The text 'We simplify how the world gets built.' is overlaid in white, bold, sans-serif font.

We simplify
how the world
gets built.

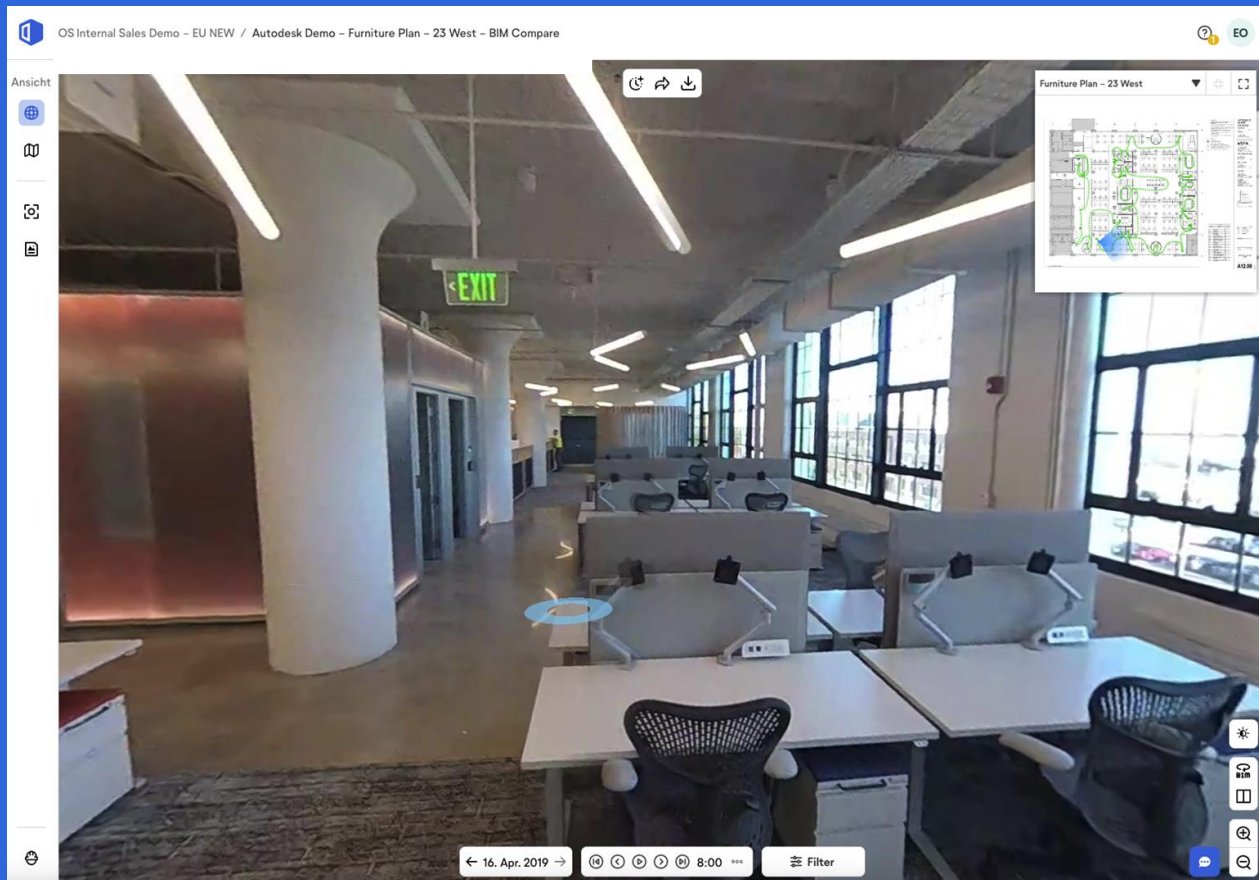

Site documentation can be that easy

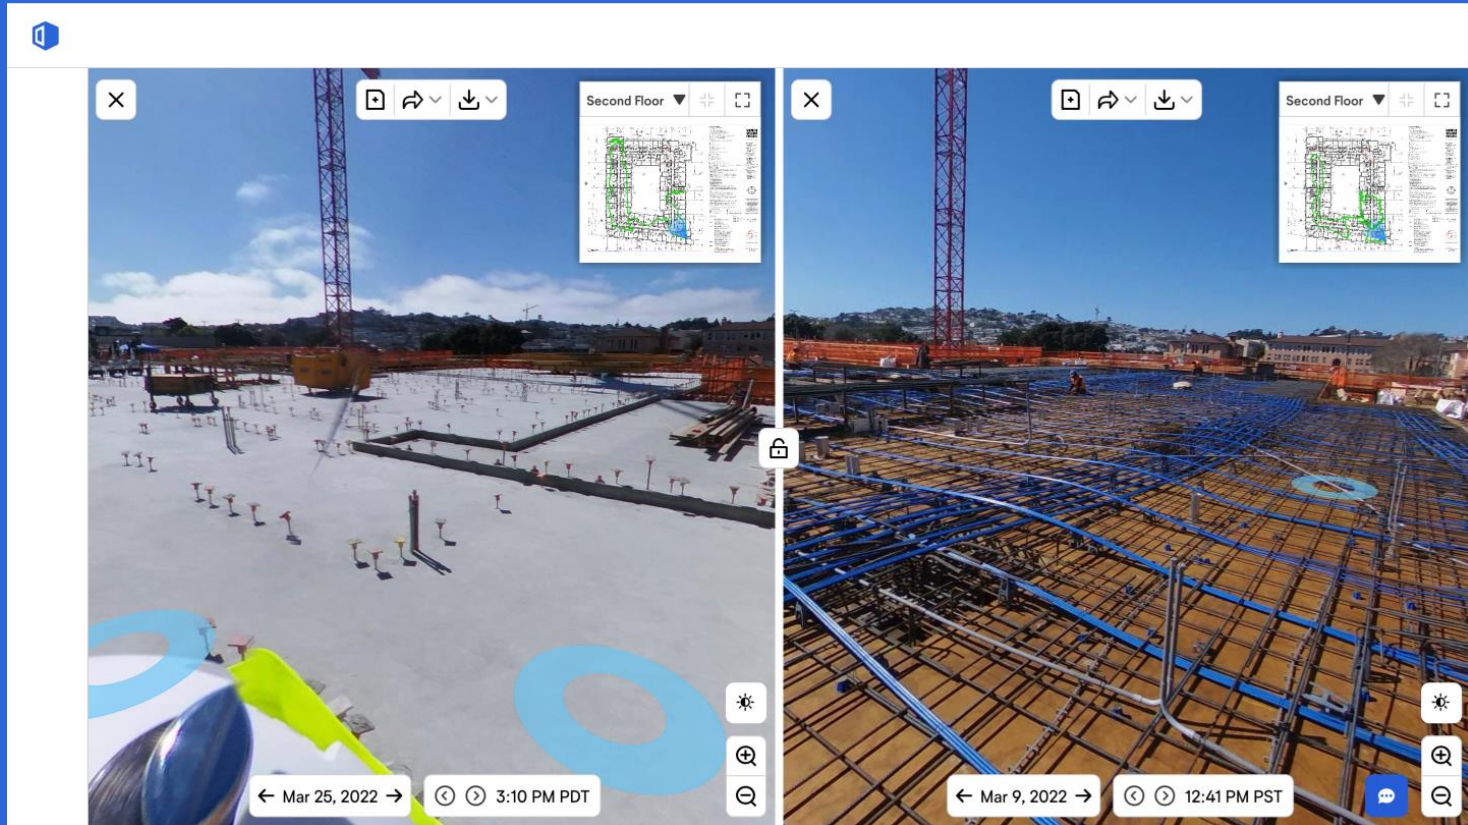

The result: a complete 360° documentation of your site

Simple, intuitive software, that everyone can use

A time machine and insurance policy in one

Win more business with Timelapse Videos
